

# Nathan Dunne

I am a student of Computer Science at The University of Warwick moving into my final year in 2019, having taken an intercalated year to work as a Software Development Intern at Sophos. I consider myself a dedicated and hardworking student, with a positive attitude and a desire to improve that helps me to quickly develop new skills. Currently I am looking for a graduate position for 2020, and hope to find somewhere that will continue to challenge me after university, and allow me to use and expand on the knowledge and skills I have gained over the course of my degree.

---

## Education

---

## Employment

### Summer Intern Embedded Software Engineer

June 2019 - August 2019

ARM Ltd.

- Assigned to the 'Clamshell' team to work on optimisation of the Chromium web browser.
- Took over an investigation from a graduate into a Google framework that could allow greater performance for the chromium binary based on its branching patterns.
- This required me to become familiar with building the Linux Kernel, gain a deeper understanding of benchmarking the performance of software, and use an ARM hardware development board for the majority of my work. I also expanded my debugging knowledge with gdb/gdbserver, carrying over what I had learnt at Sophos and expanding on it.

Sophos Plc.

- Assigned to the 'Fasttrack' team to work as Development for Global Escalations Support.
- Investigated customer and internal product issues when code analysis or a higher level of technical understanding was needed, requiring me to learn a number of debugging tools, as well as quickly become familiar with new code bases in .Net, C++ and C for different components.
- Root causes were identified through live or static debugging, and analysis of logs generated by the product itself as well as troubleshooting tools e.g. Sysinternals, WireShark. In cases where a genuine bug existed I was sometimes able to implement fixes for the team that owned the product.

## Technical Skills

Programming	Scripting	Source Control	Operating Systems	Productivity	Debugging
C++/C	Python	Git	Windows	Visual Studio	gdb
Java	Bash	Perforce	Linux/UNIX	Microsoft Office	WinDBG
JavaScript	PowerShell			LibreOffice	SysInternals
Ada	Lua			LateX/BibTeX	WireShark

## Volunteering

### Project Leader

October 2016 - June 2018

Warwick Technology Volunteers

- Planned, coordinated and lead sessions for school age students aimed at inspiring them to utilise technology creatively rather than simply consuming it. Our sessions involved either Scratch or Arduino as a platform, and usually consisted of assisting the students through a set of resources we've created.
- Also advertised the project to fellow uni students to gain more volunteers and run more sessions, and provided training for the volunteers, to ensure a sufficient level of technical knowledge for them to lead school sessions themselves.
- This greatly improved my confidence, communication, presentation giving, and teamwork & leadership skills.

## Interests

- **Rock Climbing**  
Indoor Rock Climbing and Bouldering
- **Charity Fundraising** (Warwick RAG)
  - 3 Peaks challenge: >£600 for *The Meningitis Research Foundation*
  - Mount Kilimanjaro: >£3400 for *The Meningitis Research Foundation*
  - Skydive: >£400 for *Alzheimers Research UK*
- **Powerlifting**  
Warwick Barbell Member 2018 - present
- **Technical Theatre**  
Lighting design for productions of *Speed*, *Death of the Radiant Child*, *Cabaret*;
